

## Keep Your Forms. Leverage the Data.

If you're like most agencies, your staff creates piles of paper every day. Permits. Checklists. Requests. Notification letters. Some forms are entirely paper based, some are in document templates, some are triplicate carbon copies. You're filing them away in a cabinet or storing them on a shared drive. They're hard to access and even harder to search. You have information to track in too many places.

### Your Forms, Your Way.

You need your forms. They're not going away. Don't settle for fitting your information into a standard one-size-fits-all form. **Zuercher Custom Forms** gives you a tool to create any form you want. Just like what you use right now. Or better than what you use now. It's not just a printout or piece of paper. It's part of your integrated system.

Create a use of force form that can be attached to related cases. A vacation request form that attaches to personnel records. A notice of seizure letter attached to a civil process. There's no waiting for software developers to create what you need. When your needs change, you can always change the form or design something completely new. Right away. Know another agency that has built a Zuercher custom form you like? Import it to your system. Or export your form and share it.

### Not an Add-on. It's Built In.

This is more than a mail merge or a document template. You have the power of your Zuercher software database behind every form. There's no retyping. Pull known information like names, vehicles, addresses, and case numbers into the form from the record. And when you enter a name on a form, you'll see a

notification if there's a warrant, a protection order, or any kind of alert in your system. Everything is there. Connected.

**Zuercher Custom Forms** is included with Zuercher software. That makes each form an integral part of your integrated system. Attach them to any record: a case report, call for service, or inmate record. View or print them whenever you want. Or e-mail them directly from the system.

## Collect It the Way You Need It.

Create whatever you need, using your headings. You design your form within your Zuercher software and it looks just the rest of the forms in your filing cabinet. You choose your own language. Your own format. Use customized drop-down menus, free form text, check boxes, or information blocks like names or addresses that are connected to your master records. Even capture electronic signatures. You decide what information is required. Make changes anytime you need to. And even print them using customized templates to make them look just the way you want.

## Don't Just Fill It Out: Use Your Data.

Completed forms aren't trapped within your system. Find your forms without digging through filing cabinets or having to go to that one workstation where the information is saved. Since you've attached them to corresponding records, they're easy to access.

Take the next step and analyze the data by creating custom reports. Run an ad-hoc report to determine which officers have the most use of force reports. Set a recurring report on inmate mail confiscations to be e-mailed to your jail supervisor daily. Build your Zuercher Dashboard to alert you to all pending vacation requests every time you log on.

## We'll Show You How.

You're not on your own. We have plenty of resources to show you how to build and use **Zuercher Custom Forms**. Our trainers will demonstrate the process. Watch videos, read our training documents, or participate in regular webinars to refresh your skills. And our support staff is always happy to help if you have questions.

## Make It Happen.

Get ready to create the forms you need everyday and leverage all the information you collect. Contact our sales team for information or a demonstration of **Zuercher Custom Forms**.

### Features

- Ad-hoc Reports
- Agency Defined Layouts
- Configurable List Screens
- Configurable Search Filters
- Custom Dashboard
- Custom Fields and Labels
- Custom Queries
- Electronic Signatures
- Fine-grained Permissions
- Integrated Alerts
- Integrated Template Printing
- Letter Generation
- Link to Records
- Master Name, Vehicle, Address Index Access
- Recurring Reports
- Statistical Analysis

"IT'S VERY EASY TO  
BUILD A FORM IN THIS  
SYSTEM."

IT HAS STREAMLINED  
OUR OPERATIONS  
TREMENDOUSLY."
