

Control Your Cash Flow. Along With Your Workflow.

Somebody's got to handle the money. You may have cobbled together a system of paper receipts and spreadsheets. You're entering payments in a ledger at the counter. Figuring out fines with a calculator. Your daily work is hard enough without having to worry about how to deposit the funds. Write the checks. Reconcile the accounts. You know you need an accounting system, but can a standard software package do it?

Mars Sheriff's Office		Printed on December 19, 2016

			Total: \$100.00

No More One Size Fits All.

Zuercher Financial is an integrated accounting system, perfectly tailored to fit the unique needs of law enforcement agencies. Because public safety is what we do. Your financial workflow is different than most businesses. It goes hand in hand with your everyday work: issuing permits, booking inmates, or serving warrants.

You need a complete, auditable financial system that understands how and when your agency handles money. A system with fine-grained permission levels that restrict access to financial records to just those who need it. You don't have to understand accounting to use **Zuercher Financial**. You can use it at a very basic level. If you have the need to do more sophisticated accounting, you can take advantage of the more advanced features.

Fully Integrated, Fully Paper-less.

Zuercher Financial is tightly integrated with your Zuercher Suite system. It's designed to seamlessly incorporate the financial side of the work you do every day: civil service, inmate billing, tow records, warrant service, pistol permits, and even parking tickets. Data flows directly from your records management, jail management, administration, CAD, and civil service software.

You've already got the records. Configure your system to automate financial processes using the software you depend on to do your work every day. Should the fine for a ticket for 10 mph over the speeding limit be

\$80? Or \$100 for 20 mph over? What about court costs or state fees? Set up your system to do it automatically. Create and print ready-to-mail invoices. Without your staff having to dig through your system for data. Or type it into spreadsheets or letters.

See the Big Picture.

Stay on top of your agency's total financial picture with **Zuercher Financial**. You've got a full audit trail of every transaction, including voided and deleted financial records. An account ledger allows you to monitor overall account balances, view account history, or select any transaction. Dig into the details if you need to.

The account reconciliation feature makes it simple to do your "banking." To see that all funds are accounted for. It even flags any unreconciled amount. Easily make deposits or disbursements. Generate custom reports on whatever you need to track. Profit and loss. Receipt income. Inmate expenses. Filter by account if you want. Disseminate full details or summary information only.

Financial Records You Can Find. Right Now.

Navigating through your financial data is easy. It's clearly displayed side-by-side with related records. Your civil service software not only logs every attempt to serve papers, but also shows the fees that incur every time the process server goes out. Cross links are provided to your full financial records.

The main financial screen offers powerful search capabilities so any financial record can be located quickly. Financial transactions are linked together so you can follow the flow of money. Check account balances or a customer's detailed transaction history. Nothing is more than just a few clicks away.

Make It Happen.

Get ready for an accounting system tailored to meet the unique accounting needs of your law enforcement agency. Contact our sales team for information or a demonstration of **Zuercher Financial**.
