

See What Dispatch Sees. Now.

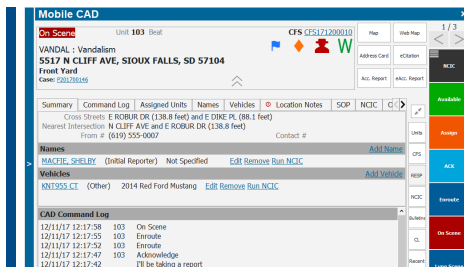

You never know what you'll find when you arrive on the scene. Going in blind is really hard. And really dangerous. You have to radio in for more information. Ask for more background. You want to act instead of react.

Be Aware: Stay Safe.

Before you walk in the door or up to a car, get the details you need to stay safe with **Zuercher Mobile CAD**. See the 9-1-1 call information. Run your own NCIC query. Know about a BOLO or an outstanding warrant before you encounter a suspect. From your patrol car, silently and quickly search all of your Zuercher Suite data for background history about a person, address, or vehicle. It's easy to find what you need.

The Big Picture -- And the Details.

Take your situational awareness to the next level with the same information and map your PSAP uses to dispatch. Get routing information. Access GIS data: road closures, the nearest intersection, or mile markers. Use AVL to see your own location, and where other responders are on the map. You see it all. Know it all.

Do It Your Way.

Each agency and individual officer can pick a view. Set commands. Configure the mobile dashboard. Set up your **Zuercher Mobile CAD** screen to show only the

units or the calls that are relevant to you. Use shortcut buttons and hot keys to carry out the functions you use most.

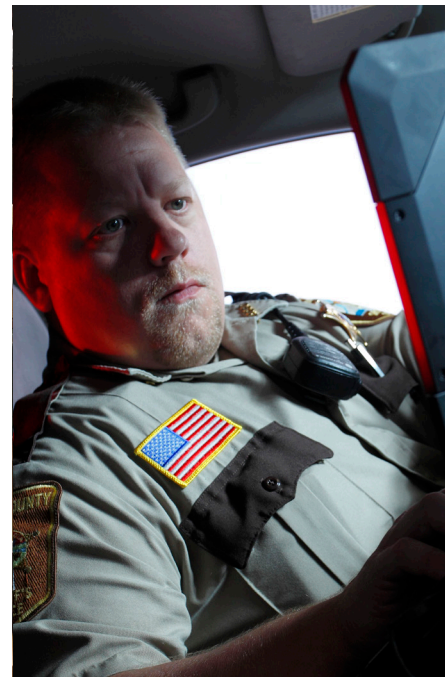

Speed It Up.

Response time is that much faster with color coded alerts and audio tones. You set it up with the notifications you want. You don't have to wait for radio traffic. It alerts you. An NCIC return. An assignment to a call for service. It gets your attention and gets you there fast.

Set shortcuts on your screen to shave off seconds. Hit a button to let dispatch know you've arrived. Or assign yourself to a call just a block away. When you're done, all the information integrates with your Zuercher Records. There's no retyping. Even your follow-up will be faster.

Make It Happen.

Get ready for a mobile CAD system that gives you more knowledge where you need it: in the field. Contact our sales team for information or a demonstration of **Zuercher Mobile CAD**.

Zuercher Mobile CAD

MOBILE CAD FEATURES

- AVL
- BEATS/BEAT PLANS
- BULLETINS
